By udemy

PROJECTS

My Portfolio

[View:Portfolio](#)

- Personal **Portfolio** is a responsive and interactive website built using React, showcasing projects, skills, and experience. It features smooth navigation, modern UI design, and section-based scrolling for a clean user experience.
- Developed with React and CSS, this **portfolio website** highlights key projects, technical skills, and contact details with an engaging, mobile-friendly layout and component-based architecture.

Foodie

[View: Foodie](#)

- Foodie** is a full-stack food ordering web application built using the MERN stack (MongoDB, Express.js, React,Node.js). It offers real-time menu browsing and secure order management with a modern, responsive UI.

- Developed with the MERN stack, **Foodie** delivers a seamless food ordering experience featuring dynamic item listings, backend integration with MongoDB, and a responsive React-powered frontend.

Code Box

[View: Code Box](#)

- **Code Box** is a full-stack code-sharing platform developed using the MERN stack. It allows users to write, share, and save code snippets in real-time with a sleek, developer-friendly interface.
- Built with the MERN stack, **Code Box** offers a collaborative environment for developers to create and manage code snippets with live syntax highlighting and responsive design.
